

Go the distance

At more than 2.5x the distance of Cat6,
it's a GameChanger.

When the standard solution isn't enough

1Gb/s and PoE+ over 200 meters – That's a GameChanger

Frequently Asked Questions

WHAT'S THE MAXIMUM DISTANCE I CAN USE THE GAMECHANGER CABLE?

That depends on the power and bandwidth requirements of your application. At a minimum you can expect 1Gbps at 200 meters (656 feet) and you can expect 10 Mb/s at 259 meters (850 feet.) You can also expect to deliver 802.3at Type 2 "PoE+" up to 850 feet.

DOES THE GAMECHANGER WORK FOR ALL APPLICATIONS?

Yes, the GameChanger Cable is agnostic to the type of Ethernet traffic you are running. We have seen customers using GameChanger to solve long distance cabling issues for access points, surveillance cameras, VoIP phones, point of sale devices, access control, digital signage, and much more.

WHAT'S THE DIFFERENCE BETWEEN THE GAMECHANGER AND A STANDARD CAT6?

The Gamechanger has been designed with an increased gauge size, carefully designed twisting and a specialty materials to be optimized for long distance Ethernet applications.

WHO IS HAVING SUCCESS WITH THE GAMECHANGER TODAY?

Several of the world's largest security integrators (6 out of the top 8) began deploying the GameChanger as early as 2016. Consultants and Engineers around the world have specified the Gamechanger as a critical part of their solutions for everything from airports to banks and parking structures to amusement parks.

Award Winning Technology

The GameChanger Cable has been turning heads with the most respected organizations in the industry!
